

Hybrid flux cored wire for carbon steel suitable for robotic system/oscillator for structural steel industry including seismic application  
AWS A5.20 E70T-1C H8

## Features and typical fields of application

- MX-50R is a 70ksi class mild steel flux cored wire specifically designed for use with Kobelco's ARCMAN™ robotic system and ARCMAN™ series Portable. Hybrid slag formula gives MX-50R its excellent weldability and efficiency in flat and horizontal position.

### 【Compared to conventional Flux Cored Wire (A5.20 E70T-1C, E71T-1C)】

- Higher deposition rate
- Less slag generation

### 【Compared to conventional Metal Cored Wire (A5.18 E70C-6M)】

- Smoother bead shape with minimal sagging even in horizontal groove welding
- Straight CO<sub>2</sub> shielding gas is available

- Its low fume emission formula creates a clean welding environment at any welding condition.
- MX-50R has AWS D1.8 approval, making it a superior choice for seismic applications in the structural steel industry.

### Bead appearance

MX-50R, 0.052", Horizontal Groove Welding with ARCMAN™ series Portable with 100%CO<sub>2</sub> gas

## Mechanical properties of all-weld metal per AWS A5.20 and D1.8 Structural welding code

Code	Shielding Gas	0.2% PS (ksi)	TS (ksi)	El (%)	CVN (ft-lbs)
AWS A5.20	100%CO <sub>2</sub>	65	78	32	66 at 0°F
AWS D1.8 Low H. Ipt: 31kJ/in		67	80	29	83 at +70°F
AWS D1.8 High H. Ipt: 79kJ/in		60	77	30	91 at +70°F
